DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Torres (ES2068142A2).

Torres teaches most of the elements of the claimed invention except for variable thickness and beveled edged insert. Torres teaches that it is known to provide an insert for an auger. Torres teaches a rectangular insert 13 welded to its (auger) intervals to co-operate with cutters 8. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate an insert, as claimed, in the device of Torres for the purpose of increasing the degree of chopping.

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
